

A FlyWire (glutamate rows + → -)

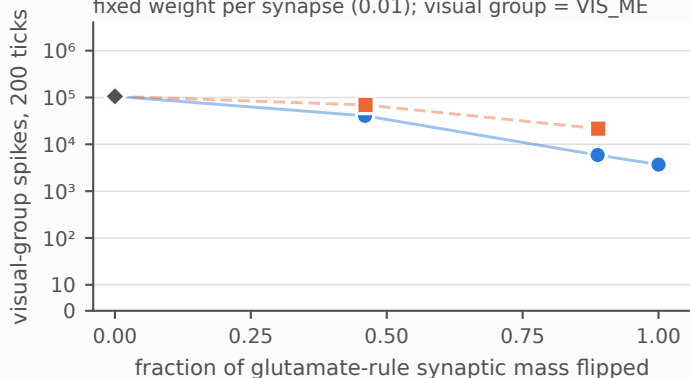

L1 normalization (ti = 4); visual group = VIS_ME

**B MaleCNS (glutamate neurons - → +)**

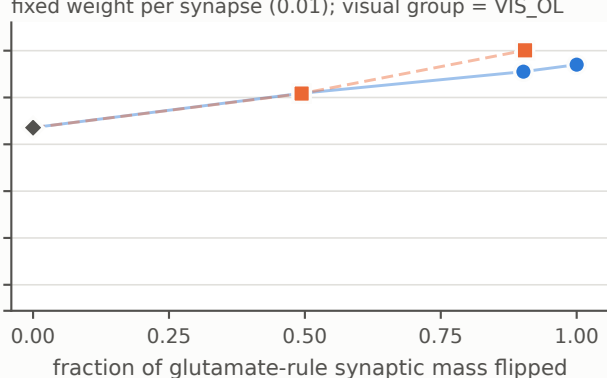

L1 normalization (ti = 4); visual group = VIS_OL

**C FlyWire — per-synapse weights**

fixed weight per synapse (0.01); visual group = VIS_ME

**D MaleCNS — per-synapse weights**

fixed weight per synapse (0.01); visual group = VIS_OL

—●— glutamate units, random fraction (E2)
● glutamate units, equal-mass pair (E1b, E3c)

■ matched non-glutamate control
◆ package default (no flip)
